

I am a XM Fan living in DC. This area has the second worst traffic in the country with roadways jammed even in the middle of the day. XM is a God Send and I will be furious if they have to cease the service. If the local stations would offer a competitive service that would be great but they only offer traffic every 5-10 minutes and that is during morning and afternoon drive time. I am a full time mom and full time sales person and need to have traffice reports all day long not just in drive time when the airtime is sold by the station.

This is a public service and if XM is forced to stop broadcasting these reports then the federal government should pick up the service just like NOAH weather radio.

XM offers a comprehensive traffic reports that keeps people out of traffic and that saves fuel and is better for the environment!!
